**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of claims 1-6 in the reply filed on 03/29/04 is acknowledged.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (US 2003/0202134).

Kim teaches a semiconductor device comprising (fig. 8 and associated text):  
a semiconductor substrate 100;  
a gate line 130a crossing over the substrate; and  
a protecting pattern 300 covering ends of the gate line.

With respect to claims 5 and 6, a gate line comprises of an oxide pattern and conductive pattern of tungsten is well-known to one of ordinary skill in the art of making semiconductor devices.

With respect to claim 2, the use of silicon nitride or silicon dioxide as protection material is well-known to one of ordinary skill in the art of making semiconductor devices.

***Allowable Subject Matter***

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
